**RINGKASAN**

Formulasi Kebijakan penentuan penerima Bantuan Langsung Tunai Dana Desa (BLT DD) di Desa Sidomulyo, Kecamatan Batu, Kota Batu. Bantuan Langsung Tunai Dana Desa (BLT DD) merupakan instrumen strategis perlindungan sosial bagi keluarga miskin dan rentan di tingkat desa yang dialokasikan maksimal 15% dari total Dana Desa, yang diatur dalam Peraturan Menteri Desa PDTT Nomor 2 Tahun 2024. Permasalahan utama dalam implementasi BLT DD adalah ketidaktepatan sasaran penerima, terutama terkait ketidaksesuaian Data Terpadu Kesejahteraan Sosial (DTKS) dengan kondisi riil lapangan. Penelitian ini bertujuan mendeskripsikan proses formulasi kebijakan penentuan penerima BLT DD di Desa Sidomulyo, mengidentifikasi faktor-faktor yang mempengaruhi, serta menganalisis hambatan dalam proses formulasi kebijakan. Penelitian ini menggunakan pendekatan kualitatif deskriptif dengan teknik pengumpulan data melalui observasi, wawancara mendalam, dan dokumentasi. Penentuan informan dilakukan dengan menggunakan snowball sampling. Analisis data dilakukan melalui tahapan pengumpulan data, penyajian data dan penarikan kesimpulan. Hasil penelitian menunjukkan bahwa formulasi kebijakan penentuan penerima BLT DD di Desa Sidomulyo masih memiliki Hambatan dalam ketidaksesuaian Data Terpadu Kesejahteraan Sosial (DTKS) dengan kondisi riil masyarakat di lapangan. Data DTKS seringkali mengalami keterlambatan pemutakhiran sehingga masih mencantumkan nama warga yang sudah meninggal dunia atau yang kondisi ekonominya sudah membaik, sebaliknya terdapat keluarga miskin baru yang belum terdata dalam sistem.

**SUMMARY**

The policy formulation for determining beneficiaries of Village Fund Direct Cash Assistance (BLT-DD) plays a crucial role in ensuring effective social protection at the village level. BLT-DD is a strategic social assistance instrument aimed at supporting poor and vulnerable households and is allocated up to 15% of the total Village Fund, as regulated by the Minister of Villages, Development of Disadvantaged Regions, and Transmigration Regulation Number 2 of 2024. A key challenge in BLT-DD implementation is inaccurate beneficiary targeting, primarily due to discrepancies between the Integrated Social Welfare Data (ISWD) and actual socio-economic conditions at the community level. This study aims to examine the policy formulation process for determining BLT-DD beneficiaries in Sidomulyo Village, Batu City, identify influencing factors, and analyze obstacles encountered during the formulation process. Employing a descriptive qualitative approach, data were collected through observation, in-depth interviews, and documentation, with informants selected using snowball sampling. Data analysis was conducted through data reduction, data presentation, and conclusion drawing. The findings reveal that the policy formulation process remains constrained by outdated and inaccurate ISWD, which often include deceased individuals or households whose economic conditions have improved, while newly impoverished households are not yet recorded.
