

ABSTRAK

Karolus Hide Blikololong. 2022. **Hubungan Lama Studi Dengan Indeks Prestasi (IPK) Mahasiswa Keperawatan Universitas Tribhuwana Tunggadewi Malang**. Program Studi Sarjana Keperawatan, Fakultas Ilmu Kesehatan, Universitas Tribhuwana Tunggadewi Malang. (1) Sirli Mardiana Trishinta, M.Kep, Ns (2) Rachmat Chusnul Choeron, M.Kes, Ns.

Indeks prestasi merupakan tahap terakhir sistem penilaian yang diterapkan di kampus dari hasil penjumlahan semua nilai mata kuliah mahasiswa yang telah diselesaikan, IPK merupakan faktor yang penting dalam perguruan tinggi, semakin banyak SKS maka semakin lama pula studi di perguruan tinggi. Penelitian ini bertujuan untuk mengetahui pengaruh hubungan lama studi dengan indeks prestasi (IPK) Mahasiswa Keperawatan Universitas Tribhuwana Tunggadewi Malang. Desain penelitian deskriptif korelatif dengan menggunakan pendekatan *cross sectional*, jumlah populasi 88 mahasiswa, dan sampel 88 mahasiswa, teknik pengambilan sampel menggunakan simple random sampling. Pengumpulan data menggunakan nilai SKS dan data lulusan TA 2020/2021 Prodi Keperawatan Unitri Status per Oktober 2021, dan dianalisis menggunakan *chi square*. Hasil penelitian menunjukkan sebagian besar mahasiswa keperawatan Universitas Tribhuwana Tunggadewi Malang menyelesaikan studinya tepat waktu, Sebagian besar mahasiswa keperawatan Universitas Tribhuwana Tunggadewi Malang lulus dengan indeks prestasi kumulatif (IPK) sangat memuaskan, dan hasil uji *chi square* didapatkan nilai $p\text{ value} = 0,000$ ($p < 0,05$) yang berarti terdapat hubungan yang signifikan antara lama studi dengan indeks prestasi (IPK) Mahasiswa Keperawatan Universitas Tribhuwana Tunggadewi Malang.

Kata Kunci : Lama Studi, indeks prestasi Kumulatif, Mahasiswa

ABSTRACT

Karolus Hide Blikololong. 2022. **Relationship between Study Length and Achievement Index (GPA) of Nursing Students at Tribhuwana Tunggadewi University, Malang.** Nursing Undergraduate Study Program, Faculty of Health Sciences, Tribhuwana Tunggadewi University, Malang. (1) Sirli Mardianna Trishinta, M.Kep, Ns (2) Rachmat Chusnul Choeron, M.Kes, Ns.

The achievement index is the last stage of the grading system applied on campus from the sum of all the scores of student courses that have been completed, GPA is an important factor in higher education. This study aims to determine the influence of the relationship between the length of study and the achievement index (GPA) of Nursing Students of Tribhuwana Tunggadewi University Malang. Correlative descriptive research design using a cross-sectional approach, a population of 88 students, and a sample of 88 students, a sampling technique using simple random sampling. Data collection using credit scores and data on graduates of FY 2020/2021 Nursing Study Program Unitri Status as of October 2021, and analyzed using chi square. The results showed that most of the nursing students of Tribhuwana Tunggadewi Malang University completed their studies on time, most of the nursing students of Tribhuwana Tunggadewi Malang University graduated with a very satisfactory cumulative achievement index (GPA), and the chi square test results obtained a p value = 0.000 ($p < 0.05$) which means there is a significant relationship between the length of study and the achievement index (GPA) of University Nursing Students Tribhuwana Tunggadewi Malang.

Keywords: Study Length, Cumulative Achievement Index, Students
