Ferdinand Jakonias Bilmaskosu. 2020320020. Persepsi Pengguna Terhadap Fasilitas *Playground* Di *Rest Area* Jalibar di Desa Oro-Oro Ombo Kota Batu.

Pembimbing Utama Ir. Hesti Triana Soelistyari. Ms. Pembimbing Pendamping Hendra Kurniawan, SP., M.Ling.

Rest area merupakan proyek *Multiyears*, karena dibangun dalam tempo 3 tahun, pembangunan diawali tahun 2018 dilanjutkan tahun 2019 sedangkan target selesai pembangunan di 2020, *Rest Area* Jalibar merupakan salah satu sarana penunjang yang ada di Desa Oro-oro Ombo. *Rest Area* atau tempat istirahat memiliki fungsi utama yakni sebagai tempat beristirahatnya pengendara dan penumpang agar terjaganya kebugaran fisik dan psikologis yang berdampak pada kenyamanan dan kesegaran pikiran. Selain itu sebagai tempat beristirahatnya kendaraan setelah menempuh jarak jauh. Salah satu fasilitas penunjang bagi anak-anak untuk *reflesing* adalah area *playground* karena alat permainan di *Rest Area* dapat di jangkau dengan mudah oleh anak-anak sehingga dapat melepaskan penat dari perjalanan yang jauh. Penelitian ini bertujuan untuk mengidentifikasi persepsi pengguna terhadap fasilitas *playground* di *Rest Area* jalibar di desa oro-oro ombo, kota batu. Berdasarkan persepsi pengguna serta Menyusun rekomendasi guna meningkatkan pengelolaan fasilitas *playground* di *Rest Area* Jalibar. dilakukan melalui penilaian terhadap beberapa parameter yaitu, Keamanan, Kenyamanan, Kelengkapan Fasilitas. metode analisis yang digunakan pada peneltian ini adalah metode deskripif dengan pendekatan kuantitatif. Selanjutnya dianalisis menggunakan skor *skala likert*.

Hasil penelitian mengenai persepsi pengunjung terhadap fasilitas *playground* di *Rest Area* Jalibar, diperoleh temuan bahwa persepsi pengunjung terhadap tiga aspek utama yang diteliti, yaitu aspek keamanan, kenyamanan, dan kelengkapan fasilitas *playground*, menunjukkan variasi tingkat penilaian yang signifikan. Aspek kenyamanan memperoleh nilai tertinggi dengan skor 70,7%, yang termasuk dalam kategori baik, menunjukkan bahwa pengunjung merasa cukup nyaman dengan kondisi fasilitas secara umum yang tersedia. Aspek kelengkapan fasilitas *playground* berada pada posisi kedua dengan persentase 65,2%, menandakan bahwa fasilitas yang ada telah mencukupi namun masih memerlukan beberapa penambahan peralatan permainan dan pemisahan sonasi antar kelompok usia untuk mengakomodasi berbagai kegiatan kelompok usia. Sementara itu, aspek keamanan memperoleh nilai terendah sebesar 60,3%, yang mengindikasikan bahwa kondisi fisik fasilitas permainan masih memerlukan perhatian khusus, terutama dalam hal pemeliharaan dan peningkatan material yang aman baik peralatan maupun lantai serta sarana pendukung untuk memastikan keamanan pengguna.

Kata Kunci: *Rest Area* Jalibar, Desa Oro-Oro Ombo, *Playground*, Persepsi, keamanan, kenyamanan, kelengkapan fasilitas.

RINGKASAN

Ferdinand Jakonias Bilmaskosu. 2020320020. User Perceptions of Playground Facilities at the Jalibar Rest Area in Oro-Oro Ombo Village, Batu City.

Primary Advisor: Ir. Hesti Triana Soelistyari, M.S. Co-Advisor: Hendra Kurniawan, SP., M.Ling.

The rest area is a multi-year project, as it was constructed over a period of three years; construction began in 2018, continued in 2019, and was scheduled for completion in 2020. The Jalibar Rest Area is one of the supporting facilities located in Oro-Oro Ombo Village. A rest area serves primarily as a place for drivers and passengers to rest, ensuring their physical and psychological well-being, which in turn enhances comfort and mental refreshment. Additionally, it serves as a resting spot for vehicles after traveling long distances. One of the supporting facilities for children to unwind is the playground area, as the play equipment at the Rest Area is easily accessible to children, allowing them to relieve the fatigue from the long journey. This study aims to identify users' perceptions of the playground facilities at the Jalibar Rest Area in Oro-Oro Ombo Village, Batu City. Based on these perceptions, the study also formulates recommendations to improve the management of playground facilities at the Jalibar Rest Area. This was conducted through an assessment of several parameters, namely Safety, Comfort, and Facility Completeness. The analysis method used in this study is the desk.

The results of the study on visitors' perceptions of the playground facilities at the Jalibar Rest Area revealed that visitors' perceptions of the three main aspects examined—safety, comfort, and the completeness of playground facilities—showed significant variation in ratings. The comfort aspect received the highest score at 70.7%, which falls into the “good” category, indicating that visitors felt reasonably comfortable with the overall condition of the available facilities. The completeness of playground facilities ranked second with a percentage of 65.2%, indicating that the existing facilities are sufficient but still require some additional play equipment and age-group zoning to accommodate various age-group activities. Meanwhile, the safety aspect received the lowest score of 60.3%, indicating that the physical condition of the playground facilities still requires special attention, particularly regarding maintenance and the use of safe materials—both for equipment and flooring—as well as supporting infrastructure to ensure user safety.

Keywords: Jalibar Rest Area, Oro-Oro Ombo Village, Playground, Perception, safety, comfort, facility completeness.
